We aim to simultaneously ensure our contribution to the creation of a sustainable society and the improvement of corporate value from a medium- to long-term viewpoint by actively working to resolve social issues through means such as promoting the recycling of waste and resources and energy conservation in our global business activities. The Group will address sustainability issues in an appropriate manner, based on Sustainability Policy.

(Article 3 of the Basic Policy on Corporate Governance)

Sustainability Policy

The Basic Policy on Sustainability, which provides a summary on views and policies addressing sustainability issues, was established on December 1, 2021.

For details, please refer to the Company website.

<https://ir.mmc.co.jp/en/sustainability/management/system.html>

<Organizational Structure for Promoting Sustainability>

We have identified particularly important sustainability issues as material issues and continuously review their materiality in order to figure out changes in the business environment in a timely and appropriate manner and take the necessary measures. In the review for the fiscal year ending March 2027, we conducted a comprehensive materiality assessment by looking at both how our business activities impact the environment and society (impact materiality) and how material sustainability issues impact our financial position (financial materiality). Based on the results of this assessment, we revised our organizational structure to promote sustainability to enable us to make decisions and manage progress according to the nature of material issues. Further, in promoting resource circulation, we integrated the Resource Circulation Strategy Meeting into the Strategy Council as of Jun 1, 2026, and have been moving forward with the examination of our resource circulation scheme at the Strategy Council from the perspective of long-term, company-wide optimization.

Based on the above, we have established an organizational structure to promote and manage company-wide cross-sectoral initiatives, with the Human Resources Committee for the enhancement of human capital among material issues, and the Sustainability/SCQ Promotion Office Meeting and Strategy Council for other material issues. Their activities are reported to the Strategic Management Committee and the Board of Directors. The new organizational structure will enable us to strategically and efficiently address sustainability issues.

For details, please refer to the diagram of “Organizational Structure for Promoting Sustainability” attached at the end of this report.

2. Response to global environmental issues

Based on the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD), we established and analyzed scenarios to grasp the impact of climate-related risks and opportunities on our business and financial affairs, and to review measures to reduce risks and capture opportunities. The results have been disclosed. Based on the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD), we have assessed the dependencies, impacts, risks and opportunities of our business related to nature, and disclosed the findings.

3. Investment in human capital

At the Group, we have set out “Our Commitment” of “For people, society and the earth, circulating resources for a sustainable future.” We believe that it is our people who promote this commitment through our business activities and that “employees are the source of new values and the Group’s sustainable growth.”

We view employees as “capital” rather than simply resources or costs. We will continue to invest in human capital to support both individual and company growth. At the same time, we aim to enhance the Group’s corporate value by developing human resources who can drive the Company’s management strategy. In doing so, we will promote measures aligned with the three pillars of our human resource strategy: Supporting Our Resource Circulation Business, Supporting Frontline Value Addition, and Supporting Every Individual to Thrive.

Accordingly the Group has established a governance system related to intellectual property in accordance with the Intellectual Property Policy and Intellectual Property Regulations of Mitsubishi Materials Group.

Guided by these policies, the Group appropriately protects and enhances its own rights while respecting third-party intellectual property rights. In order to create effective intellectual property, we have introduced analytical tools that utilize big data related to patent information for business and development strategies, generative AI technology, and other technologies. Based on the information analyzed, we are strategically developing an intellectual property portfolio with an eye to efficiently applying for and acquiring rights in line with our business strategies and research and development that support those business strategies.

Specifically, through our IP landscape activities, business units and the Intellectual Property Div. work together from the initial phase of drawing up business concepts to identify and analyze intellectual property and discuss business models, as well as the creation of intellectual property, supporting business and development strategies from an intellectual property perspective.

3) The results of the questionnaire

- The questionnaire results for the related questions were generally positive, as shown in items (i) through (iii) below. However, several comments were also observed, such as: "A substantial amount of time was being spent on matters that should be delegated to the executive side," and "While the core policies are clearly communicated to the executive side, at a more detailed level the Board presents a variety of differing opinions, resulting in a structure in which the executive side must determine which views to adopt."

- (i) Question: "Are the themes taken up at the Board of Directors and other meetings focused on matters that could have a significant impact on corporate value?"
Results: Of the ten (10) Directors, four (4) responded "Strongly agree" and five (5) responded "Agree."
- (ii) Question: "With respect to medium- to long-term management policies (particularly in FYE March 2025, in the course of discussions on the reconsideration of the Medium-term Management Strategy), is the Board of Directors, as a whole, clearly communicating its opinions and thinking to the executive side?"

In order to further enhance the effectiveness of the Board of Directors, the following is a summary of the deliberations of the Board of Directors on matters identified through the evaluation as areas where further improvement initiatives will be made in the future.

(1) Initiatives for Approach to Communication between the Board of Directors and the Executive Side

- In Directors' discussions, some Directors noted the following comments: "From the perspective of encouraging appropriate risk-taking by the executive side, it would be preferable, when necessary, for the Board to consolidate its views as a whole." and "It is important to ensure clarity regarding whether the Directors' views are being accurately conveyed to the executive side. It would be desirable to establish communication that enables the Board to understand how the executive side interprets and responds to the views expressed by Directors."

(2) Initiatives for Approach to Future Monitoring

- In Directors' discussions, some Directors noted the following comments: "At meetings of the Board of Directors, monitoring should be limited to matters further narrowed down from the Company's management policies to those of the highest importance." And "A mechanism is needed that enables timely monitoring and follow-up so that course corrections can be made when progress deviates from plans."

4. Initiatives toward Further Increasing Effectiveness in FYE March 2027

Among the governance systems under the Companies Act, we have chosen to be a Company with a Nomination Committee, etc., and by separating supervision and execution, will strengthen the Board of Directors' management supervisory functions, improve the transparency and fairness of management and accelerate business execution and decision making.

In order to promote the basic policy of "Creating the future through resource circulation" laid out in the Medium-term Management Strategy (FYE March 2027-2029), the Group introduced a business division system in the fiscal year ending March 2027 with the aim of bolstering its operational foundation by strengthening resource allocation from a company-wide perspective and integrating various functions.

Further, Outside Directors play a role in supervising the appropriateness of Directors and Executive Officers in the execution of their duties from an objective standpoint and in providing a diverse range of values regarding the management of the Company based on expert knowledge and through experience that differs from that of officers who advanced internally, so that the Board of Directors' management supervisory functions would be further strengthened.

- (2) The performance of the functions and duties assumed by each Officer and contributions to the improvement of medium- to long-term corporate value shall be evaluated in a fair and equitable manner, and the evaluation results shall be reflected in remuneration.
- (3) As for the remuneration for Executive Officers, in order to have remuneration function as a sound incentive to improve the Group's medium- to long-term corporate value, remuneration shall consist of basic remuneration, an annual bonus based on performance evaluations in each fiscal year, etc. and stock-based compensation, which is a medium- to long-term incentive linked to medium- to long-term performance and corporate value. The remuneration composition ratio shall be determined appropriately in accordance with one's job position. As for the remuneration for Directors (excluding those who concurrently hold the posts of Director and Executive Officer), in principle, only basic remuneration shall be paid in cash, in light of their function and role of supervising the performance of job duties by the Executive Officers. However, Directors, who serve as the Chair of the Board or Chair of each committee shall be paid an allowance in addition to their basic remuneration in consideration of their responsibilities.
- (4) An annual bonus shall be determined with the emphasis on the performance in each fiscal year, while appropriately evaluating the relative results of Total Shareholder Return (TSR)* and the status of each Executive Officer's implementation of medium- to long-term management strategies, etc.

$$*TSR = \frac{\text{Average closing price of the stock on each day in March of the current year} + \text{Total amount of dividends per share in the current fiscal year}}{\text{Average closing price of the stock on each day in March of the previous year}}$$

- (5) A medium- to long-term incentive shall be stock-based compensation that enables Executive Officers to share awareness of profits with shareholders in order to enhance corporate value from a medium- to long-term viewpoint.
- (6) The policies for determining remuneration and the amount of individual remuneration shall be deliberated and determined by the Remuneration Committee composed of a majority of Independent Outside Directors.
- (7) Necessary information shall be disclosed actively so that stakeholders including shareholders can monitor the relationship between performance, etc. and remuneration.

2. Remuneration System for Officers

- (1) Directors (excluding those who concurrently hold the posts of Director and Executive Officer)

The remuneration system for Directors shall be, in principle, only basic remuneration paid in cash. However, Directors who serve as Chair of the Board or Chair of each committee shall be paid an allowance in addition to their basic remuneration in consideration of their responsibilities. The amount shall be determined, referring to the standards for remuneration of other companies based on the research of outside experts.

- (2) Executive Officers

The remuneration payable to Executive Officers shall consist of basic remuneration, which is fixed remuneration, and an annual bonus and stock-based compensation, which are performance-linked remuneration. The remuneration composition ratio shall be in line with “Basic remuneration/Annual bonus/Stock-based compensation = 1/1/1” (*In the case where the annual bonus payment rate is 100%) as to the President, and for other Executive Officers, the ratio of performance-linked remuneration to basic remuneration shall be set lower than that for the President.

Further, the standards for remuneration shall be determined by referring to the standards of peer companies (similar-sized companies determined by the Remuneration Committee) based on the research of outside experts.

<Basic Remuneration>

Basic remuneration shall be paid in cash as fixed remuneration in accordance with one's job position.

<Annual Bonus (Short-term Incentive Remuneration)>

The annual bonus shall be determined based on the performance evaluation, relative comparison of TSR, and status of achievement of the non-financial target set for each Executive Officer, on a single-year basis.

The specific evaluation items shall be as follows:

<<Evaluation Items>>

<Financial Performance Indicators>

- (i) Evaluation based on consolidated operating profit and consolidated operating profit by business segment (only consolidated operating profit for the President and Corporate Executive Officers) for the purpose of strongly encouraging management efforts in the core business
- (ii) Evaluation based on consolidated ROIC for the purpose of strongly promoting the efficient use of total invested capital
In the event that performance figures fall below the projected WACC values in the forecast for the current fiscal year published at the time the year-end financial results announcement for the previous fiscal year was made (hereinafter referred to as the “published forecast”), certain restrictions will be imposed on the payment rate that is based on the evaluation of consolidated ROIC.
- (iii) Evaluation based on consolidated ROE for the purpose of strongly promoting management that is conscious of shareholders' equity

The evaluation factors (i) through (iii) are to be multiplied by an adjustment factor based on the consolidated operating profit growth rate compared with other companies to enhance consciousness of growth greater than market growth (relative comparison with six domestic nonferrous metal companies and the companies chosen mainly from among similar-sized domestic manufacturing companies).

<Stock Price Performance Indicator>

Relative comparison of TSR for the purpose of strongly promoting management that is conscious of stock price (relative comparison with six domestic nonferrous metal companies and the companies chosen mainly among similar-sized domestic manufacturing companies)

<Non-financial Performance Indicator>

Qualitative non-financial evaluation based on the status of achieving qualitative non-financial targets for the purpose of strongly encouraging each Executive Officer to fulfill his/her expected role from the perspective of corporate sustainability, such as

demonstrating leadership and promoting communication, and further promoting initiatives under the Medium-term Management Strategy and initiatives in line with the Sustainability Policy*

(*) Sustainability Policy Items

<<Calculation Formula>>

By deeming the amount payable for achievement of the target (Base Annual Bonus) as 100%, the amount for each individual shall be calculated by using the following calculation formula:

$$\text{Annual Bonus} = \text{Base Annual Bonus by Job Position} \times \text{Payment Rate Based on Performance Evaluation}^*$$

- * The payment rate based on performance evaluation shall range from 0% to approximately 200% depending on the degree of achievement for each evaluation item.

<<Evaluation Weight>>

The annual bonus amount shall be determined by evaluating the base annual bonus amount corresponding to each position level at a ratio of 60% for single-year performance evaluation (adjusted using consolidated operating profit growth rate compared with other companies), 20% for relative TSR evaluation, and 20% for non-financial evaluation.

<<Target of performance evaluation for annual bonus>>

As a general rule, the published forecast shall be applied to the performance evaluation targets for annual bonuses. For the evaluation of consolidated operating profit by business segment, the published forecast for the business segment for which an Executive Officer is responsible shall be used.

<Stock-based compensation (Medium- to Long-term Incentive Remuneration)*>

Stock-based compensation shall be a system that utilizes a trust for the purpose of achieving the sharing of a common profit awareness with shareholders. This shall be used as an incentive for improving the medium- to long-term corporate value of the Group and under which the Company's common shares and cash equivalent to the proceeds from the realization of the Company's common shares (hereinafter referred to as "the Company's Stock, etc.") shall be granted in accordance with one's job position, upon retirement from the post of Executive Officers. No performance conditions nor stock price conditions shall be set with respect to the shares to be delivered.

Please note that in the case of a non-resident staying in Japan, different treatment may be applied under laws or for any other relevant circumstances.

- * The Officers' remuneration system adopts a structure called BIP (Board Incentive Plan) and grants to the Executive Officers the shares of the Company's Stock, etc. During the trust period, it is an incentive plan to accumulate points to be given to Executive Officers, and to grant the shares of the Company's common stock equivalent to 70% of such accumulated points (shares less than one unit shall be disregarded) and cash equivalent to realized value of the shares of the Company's common stock equivalent to the remaining accumulated points as compensation upon their retirement as Executive Officer, etc. One point is deemed equal to one share of the Company's common stock, and if a stock split or reverse stock split occurs during the trust period, the number of the Company's shares per point shall be adjusted according to the stock split ratio or reverse stock split ratio of the Company's shares.

<Claim for return of remuneration, etc. (Malus and Clawback System)>

If an Executive Officer violates laws and regulations or the duty of care of a good manager, the Company may, upon resolution of the Remuneration Committee, revoke the right to receive an annual bonus or demand that the Executive Officer

return the bonus after it has been paid, and revoke the right to receive the shares of the Company's Stock, etc. or demand the return of an amount equivalent to the accumulated number of points.
